

The Leader in Dry Bulk Level Measurement

[Home](#) > [Products](#) > [Point Level Measurement](#) > [VRF™ Series](#) > [Features](#)

Features

- Opti-Sense™
Uses variable radio frequency (VRF™) technology to determine the optimal operating frequency for greatest sensitivity and stability
- Wide Variety of Probe Options
Unequaled application versatility
- Test In Place
Test by using a magnetic fob without removing the cover (VRF-2000)
- Pro-Guard™
Probe design ignores material build-up on probe
- EZ-Cal® II
No initial manual calibration required
- Explosion Proof & Stainless Steel Enclosures Available

Provides more options for a wide range of applications
- Calibration Status and Alarm Lights
Green LED indicates calibration status; red LED indicates alarm status (VRF-2000)
- Captive Screws
No lost screws
